## media of the week from your amazing, intelligent, cool tas

- If you are a Harry Potter fan in any capacity, I recommend the podcast "Harry Potter and the Sacred Text." - Anon
- A favorite recent read is One Hundred Years of Solitude by Gabriel García Marquez. - Anon
- I have been obsessed with pochita and meowy from Chainsaw Man, so go watch to indulge in their cuteness. - América M.
- I have been really missing warm weather and home, so I will always recommend the Mexican group, Latin Mafia - América M.
- A great movie I saw over break is The Prestige by Christopher Nolan, highly highly reccomend - Josh
- A new eps just dropped of Abbott Elementary. Highly recommend!! - Hannah

I accidentally talked about Drake Maye in a job interview

10:09

When you raise your hand in class as a joke, and the professor actually picks you

Seattle sleeping good tonight knowing the Seahawks are the best team in the NFC

## storytime: i was once a cs200 student #emotional#notclickbait

There's a quote that inspired me recently; it is from the show "Fellow Travelers": "I spent most of my life waiting for God to love me. And then I realized the only thing that matters is I love God." I doubt my abilities in CS at times, but I love and believe in the sentiment that there is something beautiful in the earnestness of trying. Sometimes, things don't go according to plan and the CS gods don't seem to love you (they totally do). But working towards something with earnestness and curiosity is inherently worthwhile. I may not always live up to my notion of being "good" at CS (which is probably pretty unrealistic), but I like thinking about many CS concepts. Through CS, I met really good friends and the best of professors. This all matters, profoundly. Please take good care of yourself and your wellbeing. Take lots of breaks and try to be proud of any and all progress. - Anon.
